

PROJECT MANAGER

\$92,523 AVERAGE ANNUAL SALARY*

Do others seek your guidance to complete group assignments or project-based tasks? Transfer these leadership skills to the construction industry through project management. Project managers are essential to completing projects on time and on budget. Their duties can include planning, coordinating, budgeting and supervising construction projects from development to completion. Project managers usually spend most of their time on site where they monitor projects and make daily decisions about construction activities.

Education Options

A bachelor's degree, master's degree or project management certification is required.

**Average base salary does not include overtime or incentives.*

MOBILE CRANE OPERATOR

\$66,119 AVERAGE ANNUAL SALARY*

Do you wish your career involved using a joystick? No, we are not talking about becoming a professional video gamer. Mobile crane operators use state-of-the-art heavy machinery to move construction materials, earth and even petroleum products over short distances. A series of joysticks, levers and pedals allows the operator to use his or her knowledge of load calculations to place materials around a construction site.

Education Options

- Technical schools

ELECTRICIAN

\$67,269 AVERAGE ANNUAL SALARY*

If you're into sound systems, robotics or tinkering with wires, you should think about a career as an electrician. Electricians install and maintain all of the electrical and power systems for our homes, businesses and factories. Electricians in large factories usually do maintenance work that is more complex. These kinds of electricians may repair motors, transformers, generators and electronic controllers on machine tools and industrial robots. They also advise management as to whether the continued operation of certain equipment could be hazardous.

HVAC TECHNICIAN

\$62,472 AVERAGE ANNUAL SALARY*

Are you interested in model building or have coined yourself Mr. Fix It? HVAC Technicians are always piecing things together as they install, maintain and repair heating, ventilation and air conditioning systems. Can't decide between a career in mechanical systems or electronics? HVAC covers it all! Motors, compressors, pumps, fans, thermostats and computerized switches control systems in residential, commercial and industrial structures. Technicians can also specialize in specific equipment, such as hydronics (water-based heating systems), solar panels or commercial refrigeration.
